Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on applications filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), as amended effective Oct. 5, 1985. If the maintenance fee is not paid in a patent requiring such payment, the patent will expire on the 4th, 8th or 12th anniversary of the grant.

Attention is drawn to the patents which were issued on Dec. 28, 1982 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,365,351 through 4,366,578
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

The current amounts of the maintenance fees due at 3 years and six months are set forth in 37 CFR 1.20(e) and (h), as amended effective Oct. 5, 1985, which are reproduced below:

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Change to the Processing Period for Trademark Registrations Issued

The processing period between publication for opposition and registration will be changed from 10 weeks to 12 weeks beginning with applications published for opposition on Oct. 15, 1985. Therefore, from Oct. 15, 1985 onward, trademark applicants can expect to receive a registration 12 weeks after the mark is published for opposition so long as an opposition or request for extension of time to oppose is not filed against their application.

As a result of the change from a 10-week to a 12-week processing period, few if any registrations will

issue in the Dec. 24, 1985 and Dec. 31, 1985 Trademark Official Gazettes.

MARGARET M. LAURENCE,
Oct. 29, 1985. *Assistant Commissioner, for Trademarks.*

IMPROVEMENTS IN SERVICES

- *Patent Files Access* — As reported last month, we have greatly improved access for retrieval of patented files by transferring files numbering 4,000,000 through 4,097,902 from the Suitland Federal Records Center to our Eads Street File Repository. In addition, the 1970 series abandoned patent applications, serial numbers 000001 through 199999, were also obtained and are now readily available. During this effort, 13,600 abandoned patent applications and 4,600 patented files were discovered. These files were heretofore unavailable due to a mix-up in records when they were retired to the Records Center in 1971. As a result, more than 70 official searches, both current and terminated, have been resolved. Also, in excess of 110 files which were thought to be lost have been found. For information regarding the number ranges of the "newly discovered" files, please call Luther Campbell on (703) 557-3560.

- *Electronic Copy Ordering Update* — After the Nov. 26, 1985, O.G. Notice announcing this service, we decided to explore another potential method for ordering patent and trademark copies using a telephone. We are currently exploring both electronic and telephone ordering methods and have asked our deposit account customers for their comments by Dec. 16. For this reason, we will not be prepared to implement either of the new services in Jan. 1986, as planned. We hope to have either the electronic ordering service or the telephone ordering service available by Apr. 1986.

- *Submission of Drawings* — As further clarification of the O.G. Notice of Oct. 29, 1985, drawings for patent applications do *not* need to be submitted on bristol board.

  Since corrections are now the responsibility of applicants, it is more convenient for the original drawings to be kept in their possession. Only copies need to be supplied to the Patent and Trademark Office. Whether or not bristol board is used for the copies is the applicant's choice. However, the copies that are submitted to the Office must be on strong, white, smooth, and non-shiny paper. High-quality copies are necessary not only for the patent examination process, but for printing purposes.

  If corrections are necessary, they should be made to the original drawings. Either a good copy of the corrected drawings or the corrected original can then be submitted after the Notice of Allowability is mailed.

  We will be revising 37 CFR to clarify the requirements for drawing submissions.

  In addition, we are planning to change 37 CFR 1.84 to allow submission of drawings in a third size, namely 8½ by 13 inches with a one inch (2.5 cm.) top margin and bottom and side margins of ¼ inch (6.4 mm.) from the edges. Pending the rule change, we will accept drawings in this size.

This change is being made for the convenience of applicants and attorneys.

HELPFUL HINTS FROM THE PTO

- *Extensions of Time in Patent Cases (Supplement Amendments) — If a timely and complete response has been filed after a Non-Final* Office Action, an extension of time is *not required* to permit filing and/or entry of an additional amendment after expiration of the shortened statutory period.

  If a timely response has been filed after a *Final* Office Action, an extension of time *is required* to permit filing and/or entry of a Notice of Appeal or filing and/or entry of an additional amendment after expiration of the shortened statutory period unless the timely-filed response placed the application in condition for allowance. Of course, if a Notice of Appeal has been filed within the shortened statutory period, the period has ceased to run.

  Direct questions to Al Lawrence Smith, Director, Group 350, on (703) 557-3414.

Dec. 10, 1985.

THERESA A. BRELSFORD,
Assistant Commissioner
for Administration.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
